DataCeutics Project Management and Validation Services Expanded at a Leading Boston-based Biotechnology.

Philadelphia, Pa - DataCeutics, Inc.

It was announced today that DataCeutics will manage the validation and documentation of a Leading Boston-based Biotechnology Company's Software Code Environment (SCE). DataCeutics was chosen to lead this validation of the new SCE over other vendors because of its deep knowledge of SAS, clinical reporting requirements, SAS, documentation standards and company-wide embrace of quality standards.

"After completing a successful SAS v9 migration and validation, we were pleased to be engaged to perform testing and validation on a new statistical programming environment", said Greg Weber, DataCeutics' Project Manager. Mr. Weber added, "Tools for managing and controlling the analysis and reporting process have matured and we are very excited to be working to support the implementation of these solutions for our clients".

DataCeutics, Inc.

The Leader in Human Research Information Technology

DataCeutics, Inc. is the leader in human research IT and compliance services. Our solutions include both software products and services.
