### **DataCeutics Clinical Reporting Services Expanded at Leading Boston-based Biotechnology.**

Philadelphia, Pa - DataCeutics, Inc.

DataCeutics announced today that a Leading Boston-based Biotechnology has expanded their requirements for additional SAS support services and selected DataCeutics to help meet those requirements. While DataCeutics has been providing customized clinical reporting services to this company for some time now, recent developments has driven the need for additional resources who will be creating new tables, figures and listings, performing programming quality control, and verifying report output. As a Functional Service Provider specializing in clinical reporting for regulatory submission, DataCeutics is well positioned to meet these growing needs.

“For most companies in the pharmaceutical industry, resource demands and workload change on a near daily basis. DataCeutics fills a crucial need for quick response by providing experienced and skilled teams of project managers, programmers and QC specialists for short or long term projects,” said Steve Light, Principal Consultant at DataCeutics. “We have the ability to supplement teams within a sponsoring company, or to complete clinical reporting projects independently following our own controlled System Development Life Cycle and SOPs. Our experience and flexibility has been key to meeting client needs.”

DataCeutics, Inc.
