DataCeutics Partners with Leading Biotech Company to Introduce Innovative Concept to Upload Data into ClinicalTrials.gov

Philadelphia, Pa - DataCeutics, Inc.

At PharmaSUG in Orlando, 2010, DataCeutics partnered with a leading biotechnology company to introduce an innovative concept to upload data into ClinicalTrials.gov. Troy Ruth, a Senior SAS Developer at DataCeutics, co-authored a white paper proposing a novel solution for meeting the demanding requirements of the FDA Modernization Act.

By law all clinical trial sponsors are required to expand their registry of clinical trials on the ClinicalTrials.gov website. As an efficient and cost effective alternative to data entry, DataCeutics and its industry colleagues have proposed a viable option for companies to meet the requirement. By utilizing SAS® to gather the required information from existing data sources and XML to upload data directly into ClinicalTrials.gov, sponsors are able to save time and money in data entry and manpower.

DataCeutics, Inc.

DataCeutics, Inc. is the leading provider of functional services and support for data systems used in clinical research. We address the strategic outsourcing needs of pharmaceutical, biotechnology, and CRO organizations by focusing on our core capabilities in Biostatistics, Clinical Data Management, and Compliance.

Our client relationships are based on the quality and value of our FSP outsourcing service solutions, and the expertise we provide in: Clinical Research Business Process Consulting, Systems Selection/Implementation & Support, SAS Application Development, Systems Validation, Migrations, Statistical Programming/Validation, Verification, Database Administration, Clinical Reporting, Clinical Data Management, Data Entry, Regulations: GxPs, 21 CFR Part 11, Standards, e.g. IEEE, CDISC, e-Submissions, Training, Clinical System/Environment Assessments, IT Infrastructure/Environment Support, and Project Management.

DataCeutics' leading software products are the Clinical Reporting Solution™, CR Toolkit™ and DataCeutics Report Portal™.
