DataCeutics Strengthens its Global Systems Support for Clinical Data Management and Biostatistics environments

Philadelphia, PA – DataCeutics, Inc., the industry's foremost authority on systems used in Clinical Research, today announces technology enhancements for clinical data management and biostatistics environments.

Since the company's inception, which dates back to 1993, DataCeutics' sole focus has been on providing outsourcing support, consulting support, validation support, and innovative software solutions to clinical data management and biostatistics groups throughout the world. With a global client base throughout Canada, Europe and the United States, DataCeutics has positioned itself as the foremost authority on Clintrial, SAS®, and the Oracle® Pharmaceutical Application Suite.

DataCeutics is a leading developer of SAS-based Clinical Reporting Tools, and a leading provider of services in support of clinical system implementation and validation efforts. Strategically, DataCeutics has broadened its focus to include laboratory and imaging systems that integrate with other applications used in clinical research.

DataCeutics continues to adhere to the highest level of quality; and in doing so has been able to support a diverse, global client base with the pharmaceutical, biotechnology and CRO industries.

DATACEUTICS, Inc.

The Leader in Clinical Information Technology

DataCeutics, Inc. is the leading clinical technology organization focused entirely on the life sciences industry and has been providing high quality services and innovative software solutions to the pharmaceutical, biotechnology and CRO industries for over 12 years. DataCeutics' leading reporting products are the CR Toolkit™, the Clinical Reporting Solution™, and DataCeutics Report Portal™.
