DataCeutics Begins Second year of Long Term Outsourcing Contract with Leading Bay Area Biotechnology Company.

Philadelphia, Pa - DataCeutics, Inc.

DataCeutics announced today that it has started its second year of a multi-year outsourcing agreement with the leading biotechnology corporation in the San Francisco Bay area. This contract requires DataCeutics to verify all data reporting made on regulatory submissions to the FDA.

The services delivered to this customer included detailed reviews for quality of all programs and output whereby all programs and outputs were re-programmed, data was re-analyzed, errors were identified and resolved.

“Using this new process, DataCeutics reduces report errors, identifies data corrections that must be made and reduces the time required to produce quality submissions,” explains its Project Manager, Zuzana Rehm. She continued, “We have planned and delivered a motivated and highly experienced team of 13 quality control programmers to our customer and the results are showing. We have played a significant role in four recent successful submissions for this customer and expect to continue delivering high quality verification services in the future.”

DataCeutics, Inc.

The Leader in Human Research Information Technology
