DataCeutics drives a Global SAS Upgrade to Successful Completion

Philadelphia, Pa - DataCeutics, Inc. announced the successful completion of a full-scale SAS Migration for one of its clients engaged in the expansion of their operations in the United States, Japan, and the United Kingdom. This multi-national company, driven by research and development, looked to integrate its global operations and build an operation structured on improving efficiencies in areas such as clinical reporting. They looked to improve their clinical reporting environment by upgrading to SAS version 9, and implementing standards and business processes more in line with the industry.

To meet the client's primary goal of developing world-class capabilities, DataCeutics executed its proven strategy of migrating and qualifying clinical reporting environments when upgrading to new versions of SAS®. The DataCeutics team skillfully managed this large-scale project and enabled the client to announce its key system was ready for production use in version 9 of SAS.

DataCeutics deployed a team of Principal Consultants from its Clinical Reporting, IT and Compliance Services units to assist a client team. As the client congratulated DataCeutics on the effort, it was noted that the commitment, dedication and expertise demonstrated by DataCeutics made these critical steps happen. The client organization voiced its extreme appreciation, citing it is looking forward to working on further steps in building the new integrated system.

The client was extremely forthright in expressing their appreciation for the effort led by DataCeutics. By all accounts, the client was pleased with DataCeutics. Mr. Ferdock, CEO and Principal Compliance Consultant at DataCeutics was happy to relay the news to his team, congratulating them for successfully completing another project!

DataCeutics, Inc.
